

Heat Pump Water Heaters

\$350

Member Rebate

Effective 1/1/23 through 12/31/23.

BENEFITS

1. With incentives, heat pump water heaters can cost less than traditional electric water heaters.
2. They produce lots of hot water.
3. They can save more than \$3,500 over the life of the unit compared to electric water heaters.
4. They typically have 10+ year warranties.
5. They help dehumidify.

THINGS TO CONSIDER

1. Because of their noise and cooling effect, heat pump water heaters are better suited to basements than living spaces, especially if there is extra heat available from a boiler.
2. They complement but do not replace dehumidifiers, because they operate based on hot-water demand instead of humidity levels.
3. Condensate from the heat pump water heater must be pumped or plumbed to a sink or drain.
4. For optimum efficiency, install units in 10' x 10' or larger rooms with temperatures above 35°F.
5. Be sure to give the unit the recommended clearances from walls and ceilings to ensure adequate circulation and access.
6. Insulate the first few feet of incoming and outgoing pipe to minimize heat loss.
7. Air filters must be rinsed regularly.

TAKE ACTION

If your electric water heater is more than 10 years old, replace it now while incentives are available. Don't wait for it to break.

EMPOWER

Most products are eligible for Empower financing. Let us help you bundle upgrades and meet all of your energy goals in one package. Invest in your home, in your comfort, and begin generating energy savings from day one.

- On bill financing
- Low interest rates
