

ELECTRIC ACCOUNTS

Your Touchstone Energy* Cooperative TOUCHSTONE ENERGY® NEW HOME PROGRAM **2023 Energy Efficiency Incentive Form**

ELIGIBILITY AND INSTRUCTIONS FOR COMPLETING THIS FORM (Please read)

DAIRYLAND POWER

❖ To qualify for this program's \$500 incentive, the following Program/Code requirements must be met:

2021 Illinois Energy Conservation Code: to qualify for the incentive under this Program/Code, the following is required:

- a. A qualified rater or inspector* must provide documentation showing compliance with IECC 2021. (REScheck software can be utilized).
- **b.** A blower door test is required. Less than 3 air exchanges/hour at -50 Pascal is considered passing.
 - > Person performing the test must complete Section 3 of this incentive form.
- c. Submit documentation showing compliance with IECC 2021 and this incentive form with Section 1 and Section 3 completed.
- *A qualified rater or inspector refers to a person who is knowledgeable in building standards, has experience in using blower door test equipment, if blower door test is performed and is approved by your electric cooperative.
- New home must be on cooperative's lines.
- * ALL incentives will be issued in the form of a bill credit on the submitted member's account.
- ❖ One of the incentive qualifying actions listed above must have been completed in 2023.
- Incentives are in place from January 1, 2023, through December 27, 2023, or until funds are depleted.
- ❖ Additional eligibility criteria may apply. Contact cooperative for details.
- All documentation listed below must be submitted no later than 3 months after certification and no later than December 27, 2023.

2023 TOUCHSTONE ENERGY® HOME PROGRAM CHECKLIST

Defer to the Mandaton	. Doguiromento of the	2024 Illingia Engrav	Concernation Code to	r additional information
Refer to the Mandatory	/ Reduirements of the	e 2021 Illinois Enerav	Conservation Code to	r additional information.

			Check one checkbox for each requirement below	
Requirement Category	Requirement Detail	Requirement	Meets Requirement	Not Applicable
datio	Basement wall	R-15. R-20 if more than half the insulation is on the interior of the mass wall.		
	Crawlspace wall	R-15. R-20 if more than half the insulation is on the interior of the mass wall.		
	Ground cover	6-Mil vapor barrier taped at all joints with 6" overlap		
<u>P</u>	Slab	R-10 to depth of 4 ft		
Insulation	Floor over crawlspace	R-30		
	Ceilings without attic spaces	R-60. If insufficient space for R-60, then R-30, but is limited to 500 sq ft or 20% of insulated ceiling, whichever is less.		
	Ceilings with attic spaces	R-60. Wherever full height of uncompressed insulation extends over the wall top plate at the eaves, R-49.		
	Wood frame wall	R-20 exterior continuous insulation, or R-30 cavity insulation, or R-20 cavity insulation + R-5 exterior continuous insulation, or R-13 cavity insulation + R-10 exterior continuous insulation		
	Knee walls	See attic requirements		
	Mass wall: poured concrete or log	R-15. R-20 if more than half the insulation is on the interior of the mass wall.		
	Circulating hot water pipes R-3 with manual off switch			
	Mechanical system piping	R-3 if piping over 105 degrees Fahrenheit or under 55 degrees Fahrenheit		
Windows & Doors	Fenestration	U-Factor 0.30 maximum or ENERGY STAR® labeled		
	Glazed fenestration	No requirement		
	Window/Glass	U-Factor 0.30 maximum or ENERGY STAR labeled		
	Skylight	U-Factor 0.55 maximum		
	Doors	Metal insulated (exception for entry). Performance same as 2004 IECC: insulated metal U-0.6, wood U-0.5, insulated nonmetal edge, max 45% glazing, any glazing double pane U-0.35		
quipment	HVAC	Heat pump recommended & must be properly sized in accordance with ACCA Manual S, based on building loads calculated in accordance with ACCA Manual J or other approved methodologies. Dual Fuel gas furnace must be closed combustion, 90+ AFUE, & have ducted intake & exhaust. Temperature controls must be installed, including a programmable thermostat where required.		
	Water heating	Electric or heat pump recommended, or else closed combustion. Efficiency for electric: ≥0.88 UEF		
<u> </u>	Appliances	Recommend ENERGY STAR where applicable		
Ш	Lighting	Requirements of current International Energy Conservation Code.		
	Can lights	Insulation contact rated and air tight		
Exhaust	Exhaust systems	Outdoor air intakes and exhaust shall have automatic or gravity dampers that close when system is not operating. Sump pump basins should be sealed.		
	Attic ventilation	Vented with aperture = 1 sq ft per 300 sq ft ceiling area. Conditioned attics allowed.		
	Kitchen & bath ventilation	Per local or state codes		
Ductwork & Air Control	Duct work	Strongly recommended to be located in conditioned area. If supply & return ductwork outside of thermal envelope, R-19 and continuous ir barier required. Ducts in floor trusses outside of thermal envelope, R-10 required. Insulation can be in form of duct wrap or equivalent coverage with building insulation materials. Building cavities cannot be used as supply ducts. Ducts shall be sealed with mastic and mesh or U1-181a aluminum tape.		
	House wrap	Required and must be installed per manufacturer's recommendation.		
	Sealing	Limit air leakage by sealing: 1) Joints, seams & penetrations 2)Site-built windows, doors & skylights 3) Openings between window & door assemblies & respective jambs & framing 4) Utility penetrations 5) Dropped ceilings or chases adjacent to thermal envelope 6) Knee walls 7) Walls & ceilings separating a garage from conditioned spaces 8) Behind tubs & showers on exterior walls 9) Can lights & bath fan housings 10) Common walls between dwellings 11) Ducts, air handlers, filter boxes, & building cavities used as ducts 12) Other sources of infiltration
