2023 Residential Electrification Pilot

Colorado: Residential Electric Customers

Black Hills Energy offers financial incentives to residential customers to convert from natural gas water heating and space heating to energy efficient electric water heating and space heating equipment.

Rebate Checklist

Get your rebate faster by checking off these easy steps before mailing your application form. Incomplete applications may be delayed.

Determine if the equipment is eligible for a rebate (review Terms and
Conditions and Qualifying Equipment Information)
Purchase and install the equipment
Complete the application
Attach itemized invoice(s) for equipment and labor including date of
installation
Attach AHRI specification sheets
Contractor portion completed and signed
Review Terms and Conditions and sign and date application
Make and retain copies of all documents and application

Customer Signature_

Date_

Terms And Conditions

- Participant must be a Black Hills Energy residential electric customer located in Colorado.
- Customer must purchase and install the new equipment prior to submitting the rebate application.
- For measures installed by a contractor, an invoice from the contractor (not the distributor or equipment manufacturer) must be attached to the rebate application. The invoice must include: manufacturer, model and serial numbers, efficiency rating and date of installation. Equipment cost, labor and tax must be itemized.
- Purchase and installations must be completed between January 1, 2023 and December 31, 2023. Applications for work done must be received by January 31, 2024.
- 5. The Air Conditioning Heating and Refrigeration Institute's (AHRI) Unitary Directory is used to identify product classification, determine efficiency ratings and confirm matched systems. Non-matched assemblies are not certified by the AHRI and are not eligible for rebate. The AHRI directory may be found at www.ahridirectory.org
- Black Hills Energy is not responsible if your contractor provides inaccurate information about the amount and/or conditions of the actual rebate or equipment eligibility.
- To qualify for the rebate, equipment must meet minimum efficiency requirements as listed in this application.
- 8. Checks will be made payable to customer shown on invoice.
- Applications will be processed on a first-come, first serve basis. The program will end when the budget is depleted. Funds are limited.
- 10. New equipment must be installed on the premises and must not be purchased for resale. Used/refurbished/repaired/rebuilt equipment does not qualify for this rebate.
- This program is subject to regulatory rules and orders. Black Hills
 Energy reserves the right to change or to end any portion of this
 program without notice.
- Black Hills Energy will randomly inspect installations to ensure measures are implemented properly.

Verification

An itemized invoice or sales receipt indicating date of purchase, dealer/contractor name, manufacturer name and model number of equipment must accompany the rebate application. Incomplete applications will be delayed. Black Hills Energy reserves the right to verify sales receipts, canceled checks, and installations, and to conduct random inspections to verify installation of the equipment at the address indicated on rebate application. The customer agrees to reasonably provide access to the residence to inspect the equipment installed. Inspections may be performed up to one year after date of application. After approval, please allow four to six weeks for delivery of the rebate check.

Selecting the Right Equipment

The new HVAC equipment must meet minimum efficiency requirements as listed in this application. The equipment must be matched, which means the outdoor condenser unit and the indoor evaporator coil were designed by the manufacturer to work together to provide top performance and maximum efficiency. **No commercial units allowed**. Portable coolers or systems with vapor compression backup are not eligible, nor is used or reconditioned equipment.

The use of a furnace's variable speed fan to increase the SEER rating above the nominal rating will be allowed for determining rebate eligibility provided that the customer simultaneously purchased and installed a new furnace and air conditioner. The over all furnace and air conditioning rating must be found in the AHRI directory.

Tax Information Rebates may be subject to federal and/or state income tax reporting. Applicant is responsible for contacting a qualified tax advisor to determine tax liability. Black Hills Energy is not responsible for any tax consequences of the rebate program.

Disclaimer Black Hills Energy does not guarantee that installation of equipment qualifying for rebates will result in reduced energy usage or demand, or in cost savings. The Customer will hold harmless Black Hills Energy and its officers, directors, shareholders, agents, employees, and representatives from all claims, liabilities, fines, interest, costs, expenses, and damages incurred by the Customer, for any damage, injury, death, loss or destruction of any kind to persons or property, to the extent the damage, injury, death, loss or destruction arises out of or is related to the conduct, negligence, willful misconduct, misrepresentation, breach of warranty or other breach of this rebate form on the part of Black Hills Energy.
